ARE YOU
A **LEMON**?

HOW TO KNOW FOR SURE ...

(YOU'RE BETTING YOUR LIFE ON IT!)

We grow through our teenage years feeling great, often feeling as young adults that we're "indestructible." **Then something happens.**

Some folks "never see a doctor" - and actually do fine for dozens of years. (Not advisable, since many degenerative diseases are "preventable" by easy actions early on, but that's another newsletter.)

Others start with one problem area - sinuses, gut, headaches, skin, whatever. They see "that doctor" **repeatedly** ... then they start seeing **another** specialist for other problems ... then **another** and **another**. Almost all of them "frequently" (every few months or so).

We call this the "**Medical Merry-Go-Round.**"

**If your body were a car, you'd qualify to be called a
"LEMON"!**

Lemon-laws allow you to exchange the car for a model that "isn't so sick." Not so with your body.

So ... is the problem really with your body - ***or with your "doctoring"?***

Recurrent illness often isn't so "recurrent" as it is the same problem flaring up again, not having been "finally fixed" earlier.

Urinary bladder and kidney infections classically fall into this pattern, and the science is pretty clear proving this. Sinus infections likewise. Gut distresses also. Skin problems for sure. And the list goes on and on and on.

So - **YOU** are **NOT** likely a "LEMON" - all you might need is "doctoring" that goes to the **root** of where your problems are coming from.
